The Alaska Lease Not Interiered With—
The Census of Alaska.

Washington, March 4.—In the senate the joint resolution for taking the census in Alaska and allowing special agents there 37 per day to cover all expenses was passed.
The resolution offered veiterday by Yoorhees in regard to the lease of the seal islands of Alaska to the North American Commercial Company was reported bace, from the finance committee by Morrill adversely, on the grounds that the treasury department had already made a lease and the committee had no power to interiere.
Voorhees said there was nothing further from his intonition in offering the reactuation than any imputation on the conduct of the secretary of the treasury. From information in his possession he had been led to believe that there were facts that then on the properly been brought to the secretary attention, and his object had here to bring the facts to the secretary's consideration. The recommittee having decided, he acquiesged in that decision. The resource was indefinitely postponed.

Gradual Establishment of Reciprocity

Among All American Nations

Washington, March 4.—The Pan American conference hes adopted the report of the committee on international law. The committee on cut-toms union, he amount and ninority report to-day. The insperity says the establishment of a cutoma union, he generally understood, would require not only a partial sacrince of the national sovereignity or American nations, but more radical changes in their respective constitutions than they do will be about a favorable results as those obtained by free trade among the different states of the Union.

Unrestricted reciprocity might be obtained by free trade among the different states of the Union.

Unrestricted reciprocity might be obtained gradually. The first stup is regolistion of partial reciprocity treatles whereby each nation may agree to remove of the natural or manufacture of the contraction of the partial reciprocity in the natural or manufacture of the partial reciprocity of the natural or manufacture of the natural or instable of the natural or instable of the natural or of the commentation of the partial canditions will allow the contracting nations to reach unrestricted reciprocity or itse trade among some or all american ustions.

The minority, Alconso, of Chills and Pina, of the Argentine Republic, state that difference of opinion in regard to the form of the report and recommendations led the minority to reject the whole subject. There delegate, it is said, felt that as long as the United States lays a tariff on wool, toe principal article provinced in their countries, reciprocity would not bused them. Rates of Postal Telegraphy.

Washington, March 4—D. H. Beles, of New York, and a number of genitimen interested in posini telegraphy, addressed the house committee on peakoffices and post-fonds on that subject this morning. He analyzed the stat sites presented by Dr. Green, of the Western Union, with the result of establishing, as he assarted, that the average rate on Western Union, messages from distances are: 500 miles was 89 cents. The people, ho said, wanted the government to step in and compote to a certain extent. The postmaster-general's bill would do this. A uniformariate for the sutire country would be desirable, but was impracticable. The rate he would suggest on a basis of the new telegraph company dother all the service except collecting and delivery and including operators and other expenses, while he possible. Under 100 miles, focusts; who would be possible. Under 100 miles, focusts; above 30 miles and east of the Mississippi, 25 or 30 cents; whis 50 cents as a maximum. Por: Washington,

Reasons Why Port Townsend is Destined to be a City of Great

FASON 1: It has the best harbor of Fuget Sound, from Cape Flattery to Olympis, having the most convenient area, from 5 to 15 fathoms deep, with the best holding ground. There are no bars, shouls, rocks or hidden dangers of any kind throughout the entire bay, which is land locked and well sheltered from the stormy winds and from the heavy ocean swell.

EASON 2: Ease of approach from the ocean. A suiling vessel can run direct from the ocean to the

EASON 3: It is the port of en-try of Priggs Bound, and its geographical position is such that it will afford greater faclifties to commerce over a great-er extent of country than any one position on Puyet Sound.

EASON 4: It is at the entrance to Admiraity Inlet and within the lines of the proposed military works for the defense of Puget Sound, and is where the naval squadron will have a rendezvous, and where the government will build a dry dock for repairs, and a naval station for supplies for our naval vessels and the merchant marine.

EASON 5. It will become the great wheat shipping point on the Passific Crest, it has been ascertained that from the junction of the Saake and Columbia rivers to Fort Townsend there is a fall of about 490 feet, and 5that it is practically very nearly a evel grade and that one sugine can hant 22 leaded cars to Port Townsend, while it takes two decepted angines to haut 14 leaded carsthrough the tunnel to Tacoma. The peniasula which lies between Port Townsend and Port Discovery barbors, presents on both these harbors a greater extent of water front than any other position on Puget Sound, both of which can be utilized by one line of railroad, thus effering greater facilities for handing vas. quantities of wheat than can be found elsewhere in the whole country.

EASON 6: It will be the head-quarters and great point of transit of all the whaling fiest, which can here ship all their oil and hone to Eastern markets and save 700 miles of ocean travel, which they now have to take to transport these products to San Francisco.

EASON 7: It will be the head-quarters of the fish-ing business. The Union Pacific Railroad Co. stated to the senate committee on relations with Canada who were here in 1889, that they intend putting in refrigerator cars to take fresh fish through on the long haul at greatly reduced rates, and with here ships lit the salmon pack, as well as other fish products destined for the interior and Eastern markets.

EASON 8: It is the point of de-parture for all pas-sengers and Alaska, and its unri-unity and Alaska, and its unrivaled scenery makes it the admi-ration of all tourists who have ever risited Puget Sound.

EASON 9: It is the location of the smelting works of Irondale, on Port Towns indibay, where the best char coal fron known in the world is produced. A plant will be put up at these works by the company to manufacture steel plates for boilers and for building vessels, steel rails and all iron material required for interest construction and every kind of railroad construction and every kind or ron for blacksmith use.

EASON 10: Fort Townsend, by the geographical position, is intimately and directly connected with Porth rad, being deep connected with Porth ad, xingdee north, as can be seen on any migh. The Willamette meradian, which rommences in Portland as its initial point, terminates in Port Townsead bay, between Point Hudson and Marrowstone Point. The Port Townsead Southeen railroad will soon connect the two cities, and Part Townsand will become in fact one of Portland's most important shipping points.

ANNEKATION.

Recent reports are to the effect that an annextion league has been formed in Canada.

The organization of this league has doubt less been provoked by the recent refusal of the tory party to grant any satisfaction to the kinglish-speaking liberals who deare the obliteration of state schools in which the Prepeh language is taught, and other legiscat concedes special privileges. Catholic French population. The internal politics of Canada need to be understood by Americans before they can clearly comprehend that the annexation of Canada would not be a wise experiment for the United States. In the province of Quebecthe French-Canadians have no commun ity of race, language, religion or system of jurisprudence with the English-speaking provinces of the Dominion. There is a strong-prejudice against intermarriage with persons of English descent. The French-Canadian clings to his language. The Cath-olic religion is protected by treatics and acts of parliament and as completely possesses phearts of the French-speaking people as It did when Canada was a colony of France. While the criminal law of England, with some statutory modifications, prevails in the province of Quebec, the system of jurisprunce and the mode of procedure in civilactions are based on the legal principles and Quebec is as distinct from the civil law of Ontarious the civil law of Ecotland is from that of England, or the civil law of the Eline provinces of Prussia is distinct from that of the rest of Germany.

A distinguished French Canadian, John

community of race religion, language or civil law between the province of Quebeo and the rest of the Dominion, but confesses one can foresee the time when an amaigamation of the two races will be posamaigamation of the two races will be pos-able, when the language and institutions of French Canada will disappear." There is no community of interests even between Quelec and Ontario, for each has its own wers of local self-government, and each has less trade with the other than with the United States. The French-Canadian when the emigrates goes to New England rather than to the English speaking provinces of the Dominion. The states of Vermont and New Hempshire have each not less than 20 000 French of Canadian birth, or nearly one-sixteenth of the whole population. To smar Quobec would be no more desirable han to annex Mexico or Central America. If we furn to the consideration of the general government of the Dominion we shall find itvery different from the Federal govern-ment of the United States. When the Jesuit estates act was passed by the Quebec provinciallegislature the Dominion government re-fused to vete it: A national veto on local legislation is unknown under our form of movernment. Goldwin Smith shows that a presidential veto upon local legislation is not needed in the United States for these reasons: In the states composing our Union the governor's veto, unlike the veto of Canadian Bettenant governors, is often used. In the United States there is free access to the ma-tional supremo court whenever local legislation seems to closh with the constitutional interests and powers of the Federal govern-ment, while in the Dominion access to the ourts can be and is obstructed by executive interposition. The people of the United States have in their own hands the power of amending the Federal constitution, while the Dominion constitution is in the keeping of the imperial parliament in London, to which it is useloss to appeal. The national government of the United States possesses and has used the power of coercion, while ment would never venture to interpose by force. The American state is homogeneous, while the Dominion has within it a French mationality without community of race, lan-guage, religion or law in the rest of its terri-tory. For these reasons Goldwin Smith thinks that the Dominion federation will, at ne distant date, become a mere learne

It is a curious historical fact that while Canada is more favorably disposed to anmexation than ever before in her history the United States was never before so cold to anmexicion as she L to-day. More than thirty years ugo Stephen A. Donglas obtained general favor and approval for a proposition for a continental commercial union in Amarica, like the German Zollverein, which purposes of commerce—navigation, traffic, ntercourse and common defence-without aflecting forms of government or political relagive the Canadians all the commercial adrantages of unpexation. More than a century ago President John Adams declared that the thirteen colonies were destined to absorb the whole northern part of the globe and more than fifty years ago De Tocque-yille prophested that this whole continent would become our domain; that it could not escape us. Richard Cobden many years later spreed with this opinion and Charles Summer twenty years ago relierated this view that the United States would ultimately include all the territory from the Aratic ocean to the Gull of Mexico, from Aratic ocean to the Gull of Mexico, from the Atlantic to the Pacific. This vision is not likely to become realized, because our people do not believe that such a vest enpeople do not nemove the would increase our prosperity or our pernetuity as a nation.

A MEMORY PICTURE

Tic death of Rev. Jesse Moreland, one of the pioneer ministers and farmers of Oregon occurred at his home in this city Monday. After appropriate funeraliservices at race church the remains were interred. in Rock creek cometory in Clarkamas pornty, near which his early home in Orego was made.

Zhis announcement recalls a familiar

the dof a century ago, wherem "Father Mi oland, as he was even then familiarly in mn, preached the vigorous dectrine of decacer Methodism in a little log structure is d by the Rock creek graveyard, where his remains have now been consigned to each. The little cabin in which there are ple services were held has long since gion place to a more pretentious building. bu "it was useful in its day, serving the pur-pose of a district schooliouse on week days an of a "meeting house" on Sundays. Fa her Moreland was then in the best of n fiteling manhood, a vigorous though not a go us man, the weight of whose convictions her his voice far beyond the four walls of the primitive little church out over the quiet greveyard with its silent tenantry and beyo id the little clearing that gave the place a has a able appearance into the surrounding worlds. The simple eloquence of the pracher; the respectful attention of these r om he affectionately addressed as "my hearers;" the onlet mutrons in clean on co dresses, white aprons and gingham but bounds; the tired babes asleep upon the toomers; the tree, cases assect upon their bosoms; the men, clean shaven and arrayed in their Sunday best, with their toilba dened hands lying idly upon their knoes; he rosy cheeked maidens in pink calico and white sunbonnets; the awkward awains, whose love for the beautiful was demonstrated by poppies and holyhocks in their his, bands and stolen glances at the pretty faces shadowed by the white sunbonnets:

Sunday cats and hay from the wagon bed-all of these go to make up a picture once bright and real but now dim with shadowy menfories. The log schoolbones bus disap-peared, the leafy solitudes have given place to cultivated fields, the old and the middle aged who formed part of that company have passed on, the young men and maidens have grown gray and careworn, the infant in nams has taken his place in the attropy ranks of men, leaning slabs and brier-grown mounds in the old Rock creek graveyard tested of greet times of the dead that comes mounds in the old librate trees, garagement to the off offertuleness of the dead that comes with time, or of the neglect that results from distance; and as the earth opened to receive to the overlasting rest of her peaceful bosom the remains of the aged procher whose voice once made vocal the pioneer solitudes of the place with earnest supplica-tion and admonition, the closing scene was reached. Rest, carnest, conscientious toiler in the simule labors of a primitive era, having served well thy day and generation.

THE HUNT RAILWAY.

The meeting last night, called to consider the Hunt proposition, was carnest and en-thusiastic. It demonstrated the fact that the importance of the extension of the Hunt lines to Portland is appreciated, and a be ginning was made that holds out great premise of success.

If Portland will evince her interest and

faith in this undertaking by subscribing the amount of bonds proposed there will be no difficulty in placing the remainder of the bonds in the Eastern market, and the success of the undertaking will be an assured

It will not be necessary for subscribers to hold the honds. When it shall be shown that the enterprise is to be carried on in earnest a market will be made for the bonds, and they who may wish to turn thom and get their money for other uses may do so. This is largely on affair of credit, and the money that will be required is not necessarily to be drawn from business here.

neal is made to the public spirit of our citi zens. Success of the undertaking means the making of Portland the center of anlarge territory not now in communicatio with the city, or whose busings is diverted elsewhere. The proposition is one whose importance to the city cannot be overesti-mated. The road, if built, will be a new and powerful factor in extension of the business of Portland and in development of

of the annual payments to be interested the government under the provisions of the funding bill. Of course the dear people can not see, and indeed are not expected to kee, why the expense of a railroad company in reconstructing or relocating its tracks in their interests in congress should see the

The Washington correspondent of the Springfield Republican, who generally knows what he is about, says that the bill in course of preparation by the senate finance committee as a substitute for the Windom silver bill, provides for the issue of treasury notes upon the silver builion bought at the rate of \$4,500,000 per month, only in proportion to

He roundly asserts that 'the man who believes in the damnation of infants. himself deserves to lose heaven," and cites that Calvin, though a great and good man according to his light died 326 years ago. He would have preferred to let the old creed rest amid the accumulation of the cob web: of time, undisturbed since it no longer gave trouble to any splightened Christian, but since the electric light of the age has been turned on it he is in favor of a new creed throughout, one that a humane man car preach to the confort of believers while holding out the hope of pardon to sinners. The rut-worn and the self-righteous will hold up their hands in horror at this p ain statement, but the large majority of Presbyterians who have long quietly ignored the cruel has found courage to voice their own distin list in the mercless creed of Calvin and the monster Deity that it bids them worship.

The office-seeking hords of that state, whosemame was legion, have been on the ragged edge-"buir-hung and breeze-shaken" (as Edward Eggleston would say), over the gulf of despuir-for so long that cortainty, even if it announces de-leat, must be a welcome visitant. First the gauntlet of nominations had to be run, then that of election. Federal appointment has dragged its slow length through the dreary months of winter, making an occasional

Members of this sect are as orderly, law-abiding citizens as a class, as this country boasts. They may or may not be cranks onreligion, but they have the undoubted right to keep the seventh day of the work as a day of rest and worship instead of the sixth if they wish to do so and those who are content to keep the latter, have no moral, and they certainly should have no legal right to object. The results of the investigation of the civil service comminission so far are as petty as the motives that inspired it. There is no "scandal" in connection with the commission. A few theap political cranks whose craft of office breaking has been broken up by the civil service law are trying to bring it into contempt. That is the whole story. There is more sympathy in congress with the war on the law and, the commission than there ought to be, but that is easily explained; congressmen like to barter offices themselves. The charges against the comdission were trivial and the results of the investigation are insignificant.

Details are furnished of another brutal and unprovoked murder, this time in Union county. The moving causes in the case are the usual ones of whisky, lawdgess and ungoverned temper. There is a wholesome demand, in the name of humani y, for a few judicious convictions and prompt executions in this state, and we may add, indications are good that the deman I will be met to some extent before the year is six mouths old. Benator Stewart of Nevada has a plan which he proposes to offer as an amendment to the Pacific railroad funding bill, to avoid the deep snow belt in the line of the Central Pacific through the Sierra Nevada mountains. The idea is to tunnel this yest barrier of nature, thus making it impossible for the deep snows of that region to call a hait upon transcontinental traffic. The proposition is perhaps not a more startling one than was that to surmount the Sterra Nevada's by a railroad in the first place. It may indeed be said that nothing in railroad engi-neering is in the presence of the achiev-ments of the past third of a century looked upon as impossible. Stupendous it may be, in the amount of labor and money involved, but not impossible. So when we near of a proposition to tunnel the Sterra Nevada mountains below the snow line in order that the malls and traffic of a prosperous and growing section may not be subject to the chill embargo of winter we have no thought but that it can be done and little doubt that it will be. When it comes to the financial part of Senator Stewart's proposition how-ever, a wholesome doubt intrudes itself. He contends that the expense of contempo-ing the necessary tunnels shall be taken out of the annual payments to be made to the

order that the ordinary purposes of traffic may be served should be borne by the gov-ernment. It is regarded as amply sufficient point in a proposition of this kind.

the market value, instead of in the ratio of a dollar to 371% grains, as was supposed. This removes one of the saliently objectionable features of the bill, but it notes of the senate bill are redeemable in lawful money, which includes silver dollars. That is, the government may buy a dollar's

teaves two—the doubling of the compulsory monthly purchase of silver builton, and the redemption of the treasury notes in money of less than their nominal value. The first of these objections is invited in the treasury of the contract of voiced in the second. The large monthly purchases of silver would be endurable if the treasury notes to be issued upon them were honestly redeemable, as are those conworth of silver, issue a treasury note upon it and redeem that note with a coin worth

70 cents. This is the sort of finance which, whon practiced by private persons, leads to involuntary sectusion from society. This bill is purely in the interest of the silver miners. It can have no attractions for the men who want cheap money to pay debts with. Nobody but the government can get the new treasury notes for less than their real value. The only way to get more standard dollars into circulation under this bill will be to take dollar notes to the treasury to exchange: for them. There isn't much comfort for debtors in this. Steph Chosts, of New York, who followed Astoney-General Miller as one of connact for the government, opened his argument with a statement that cert since the beginning of the government the people of the United States had rested in the conveilent that they constituted anation; that within its limits the government was soverign and supreme, and that it had within itself eil the powers and facilities to fulfill its own Jurgoses.

Mr Hunt mer with the committee and stated his plans and answered all degitimate questions fully and satisfactority, and as present to night to give assurances as to his motives and to key before you assessine statement of his plans. He has constructed and has in operation about 15s miles of road which they have foregon and Washington. The freights arising along his lines are now going to the Bound and hence his road has hitherto been considered as being a portion of the borthern Pacific system. His statements show, that all though he is laboring under great disadvantages by reason of having to depend upon another line by called the order of the season of the wing to depend upon another line by the distance from his present terminus (Hunt's Penns, 1900).

The distance from his present terminus (Hunt's Junction) to Portigned is about 220 miles, and he proposes to bond for \$2,000 per mile, or nearly six million dollars for the 20 miles, and asks Portisad to subseribe two millions of this sum These bonds are to be first mortgage bonds and are to draw six par cont interest myable semi annually He is commence but ling, at the fortiand end, and for every ten miles of opisituded road for the brides are to be issued, which have been dead to the brides are to be issued, which have been dead to the brides are to be issued, which have been dead to the brides are to be issued, which have been dead to the brides are to be issued, which have been dead to the brides are to be issued, which have been dead to the brides are that the bords will not bring par, or that the Hunt mill coll out and not bring par, or that the Hunt mill coll out and not bring par, or that the Hunt mill coll out and not bring par, or that the Hunt mill coll out and not bring par, or that the Hunt mill coll out and not be the broad of a minformed he aiready has in the noigh bor root of two m line dollars in wested in his roads of his own money, besides a large railroad glaus and hence is the touroughly coulpped to see the botter. This rood will open up a new country rich in septentiare and abounding in timber and food, and doubtless in other minerals, and soud, and the fore and now constructed. What is still more important, the had office will be in Portland, and it is to be hoped its polity will not be dictated from Wall street. Thus, again there is a strong probability that if it is built as countemplated, it will earn and abounding the form in the result of a not per section. The proposition of the propositi

At the conclusion of the mayors remarks loud calls were made for Mr Hunt who was introduced by the mayor, and was given a cordial round of appliance. After entering a disclaumer as coary franchise pretensions, Mr Hunt denied the charges that he was in way way affiliated with the Northern Pacific or any other road as far as their owning any part of his road is concerned. Wall street would like to operate the good, but never had, and never would do so as long as he (Hunt) had anything to say asout its management. Mr film rocunted the highest of the preliminary conformers which had about its management. Mr. Hum recounted the fisions of the preliminary conferences which had culminated in the present meeting. "I ortifand has already profited by my lines of road and has already profited by my lines of road. The harger part of my supplies and material, have been purchased here and new the opportunity is offered for you to reach out and receive still granter advantages.
